## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-3, drawn to a method of encrypting a boot loader program, classified in class 713, subclass 189.
  - II. Claims 4-10, 16-36, drawn to a method of determining whether a radio protocol has been certified by a certification authority, classified in class 713, subclass 156.
  - III. Claims 11-15, drawn to a method of encrypting a radio protocol, classified in class 713, subclass 193.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as encrypting a boot loader program. See MPEP § 806.05(d).

- 3. In the instant case, invention II has separate utility such as determining whether a certification authority has certified a radio program. See MPEP § 806.05(d).
- 4. In the instant case, invention III has separate utility such as encrypting a radio protocol that has been certified by a certification authority. See MPEP § 806.05(d).
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/028,467 Page 3

Art Unit: 2132

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, restriction for examination purposes as indicated is proper.

- 7. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups I or III, restriction for examination purposes as indicated is proper.
- 8. Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Groups I or II, restriction for examination purposes as indicated is proper.
- 9. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 10. A telephone call was made to John Ward on 30 August 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

## Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin E. Lanier whose telephone number is 571-272-3805. The examiner can normally be reached on M-Th0 7:30am-5:00pm, F 7:30am-4pm.

Application/Control Number: 10/028,467

Art Unit: 2132
